--	----

These statistics cover the present year thus far and are furnished as a record to which one can refer at any time.

It will be noted that the attendance has been excellent, which is an indication of much interest in obtaining an education on the part of the pupils and splendid co-operation between parents and teachers.

The work of the schools in general is of a very substantial character and much credit is due to the faithful services of the teachers.

The school directors have indeed been fortunate in their selections, which is not always an easy task.

Renovations have been going on in some of the schools during the past summer and special attention is called to the splendid work performed by the citizens at East Street and the Hill school.

It is a great satisfaction to receive the second prize for rural school improvement in Rutland County. The work done at the East Street school is worthy of this distinguished honor. To encourage this work the state rebates very liberally and it would seem wise to complete the job while it can be done at the least possible cost to the town.

I wish to congratulate the citizens for the splendid achievements of the past few years and express my appreciation to pupils, teachers, parents and school directors for their efforts in the interest of education.

Respectfully submitted,

FREDERICK W. WALLACE,
Superintendent of Schools.
